Program

The Joanna Briggs Institute International Convention

‘The 2013 campaign for getting evidence into policy’

InterContinental Adelaide
Australia
21-23 October, 2013
Stand up and be counted!

And so the campaign begins!

To all delegates who have travelled from great distances, I wish you a warm welcome to Adelaide, our beautiful capital city of South Australia. Over the next three days, let us stand up and cast our votes for getting evidence into policy.

As we discuss, debate and explore this key priority, and vision of the Joanna Briggs Institute, I hope you will be able to help us promote the work of the Institute and shape our future. Your fresh ideas, on-the-ground perspectives on getting evidence into policy and into practice are what this convention is all about.

As members, subscribers, collaborators and associates, you are our lifeblood. Your innovation and energy define the work we do. This convention is therefore your convention, an opportunity to tell us your story and share your views on how we move forward.

Whether you are involved at the point-of-care with consumers or deeply embedded in clinical research, whatever your involvement in health care, let us join forces and vote for ‘The 2013 campaign for getting evidence into policy’.

Together, let us drive the future of global health care.

Professor Alan Pearson AM
Executive Director
The Joanna Briggs Institute
Keynote Speakers

**Professor Gerd Antes**

Director of German Cochrane Centre, University Medical Centre, Freiburg, Germany

Professor Gerd Antes is a mathematician, with a focus on methodology and medical statistics, and has been Professor at the Department of Medical Biometry, Institute of Medical Biometry and Medical Informatics, University of Freiburg, Germany, since 2012.

Since graduating in mathematics from the University of Bremen in 1976, his career has spanned Edinburgh in Scotland, Berlin, Bremen and Freiburg im Breisgau in Germany, working in various fields of statistical consulting, including the design and analysis of clinical trials, risk assessment, quality control and experiments in agriculture.

He has been with the Institute of Medical Biometry and Medical Informatics of the University of Freiburg since 1995. Prior to that, in 1992, he set up the Unit of Biometry in the Clinic of Tumour Biology in Freiburg, where he worked in clinical trials in cancer.

Professor Antes was responsible for setting up the German Cochrane Centre where he pioneered evidence-based medicine and the Cochrane Collaboration in Germany. Currently, he holds a position in the University Medical Centre in Freiburg as well as being Director of the German Cochrane Centre and a board member (Chair in 2001-2003) of the German Network for evidence-based medicine.

Since November 2002, he has been a member of the Guidelines Commission AWMF (German Association of Medical Scientific Societies). After several years on the Scientific Advisory Board of the International Clinical Trial Registry Platform WHO, he became project coordinator of the German Registry for Clinical Trials in 2007.

**Professor Sandra Jones**

ARC Future Fellow, Director, Centre for Health Initiatives, University of Wollongong, Australia

Professor Sandra Jones is the Director of the Centre for Health Initiatives, a Research Strength at the University of Wollongong, and an Australian Research Council (ARC) Future Fellow. From 2004 to 2009 she was also Associate Dean (Research) in the Faculty of Health and Behavioural Sciences.

Professor Jones is an internationally recognised expert in the area of social marketing, particularly in relation to chronic disease prevention and healthy lifestyles. Under Professor Jones’ leadership, the Centre for Health Initiatives has conducted numerous community-based interventions, often in partnership with health services and NGOs, to improve the uptake of health promoting and risk-reducing behaviours.

Recent community interventions include asthma among older adults, dementia risk reduction, cold and flu prevention, mental health help-seeking, physical activity and nutrition. Her research also focuses on the relationship between media and health, including the impact of advertising in the print and electronic media on health behaviour. For more than a decade she has been conducting research in the area of influences on young people’s alcohol consumption, including alcohol advertising and marketing, and her ARC Future Fellowship is a four-year whole of community intervention to address social norms around underage drinking.

Professor Jones’ career research funding exceeds $6 million; she has published more than 130 referred papers, six book chapters, and numerous policy-related monographs and reports. She is also a member of numerous policy and advisory committees, including those of cancer organisations in Australia and overseas.
Dr Susan Frampton

President, Planetree, USA

Dr. Susan Frampton is the President of Planetree, a non-profit organization that works with international health care organizations to implement Planetree’s patient/person-centered model of care.

Dr Frampton earned masters and doctoral degrees in community medicine and medical anthropology from the University of Connecticut, and has authored numerous publications, including a series on patient-centered care in the American Journal of Nursing, the International Health Federation Journal, the Patient-Centered Care Improvement Guide, the Long-Term Care Improvement Guide, and the edited collection Putting Patients First, Third Edition (Jossey-Bass Publishing, 2013).

In 2013, Dr Frampton was appointed co-Chair of National Priorities Partnership (NPP), a collaborative of 52 major national organizations convened by the National Quality Forum to identify strategies for improving safety, quality and patient-centered outcomes for the US health care system. Prior to that, in 2011, she had served on NPP’s Better Care Subcommittee which helped shape national goals to improve the quality of health and health care. She also was co-Chair of the NPP (Re)admissions Action Team which developed and executed strategies to reduce avoidable readmissions and increase the uptake of patient-centered, team-based care delivery models.

In addition to speaking internationally on culture change, quality, safety and the patient experience, she has presented keynotes on designing patient-centered practices in acute care, continuing care, and ambulatory medicine settings for various hospital associations, the Veterans Health Administration and the World Health Organization. In 2009, the Health Leaders Magazine named Dr Frampton as one of “20 People who Make Health Care Better”.

Professor Marcello Costa

Matthew Flinders Distinguished Professor and Professor of Neurophysiology Department of Physiology, School of Medicine, Flinders University, Australia

Professor Marcello Costa was born in Torino, Italy, in 1940 where he obtained his medical degree in 1967. He migrated to Australia in 1970 and was one of the founders of the new discipline of Neuroscience and the Australian Neuroscience Society, of which he became President in the 1990s. He holds a personal Chair in Neurophysiology at Flinders University, the first in Australia. In 2012 he was made Matthew Flinders Distinguished Professor at Flinders University.

He has published over 230 scientific papers in international journals, 57 reviews and chapters and written two books. He was asked, in 2003, under the auspices of the three SA universities, to lead SA Neuroscientists to form the South Australian Neuroscience Institute, of which he has been co-Chair.

One of the founders of the multi-faculty undergraduate Cognitive Sciences course, Professor Costa has taught at Flinders University since 1975. He is a pioneer in research on the nervous control of digestive functions and is still actively involved in research.

In 1988 he was made Fellow of the Australian Academy of Science and received a Centenary Medal in 2013. In 2006 he received a medal for services to the University for the Flinders 40th anniversary.
Keynote Speakers

Professor Guy Maddern
JBI Oration Guest Speaker
RP Jepson Professor of Surgery; Head, Discipline of Surgery, University of Adelaide; Director, Basil Hetzel Institute

Professor Guy Maddern was trained at the University of Adelaide and became a Fellow of the Royal Australasian College of Surgeons in 1989. His clinical interests include the physiological impact of laparoscopic surgery, and more recently the development of techniques to manage metastatic hepatic disease. He has over 400 publications in scientific journals and has contributed to over a dozen surgical texts.

At the commencement of 1996 Professor Maddern was appointed Director of the Clinical Development Research Centre, now the Basil Hetzel Institute for Translational Health Research, the Queen Elizabeth Hospital, charged with the responsibility of defining the future direction and development of research within The Queen Elizabeth Hospital campus.

In November 1997 he was appointed Surgical Director of the Australian Safety and Efficacy Register of New Interventional Procedures–Surgical (ASERNIP-S). This organisation, funded by the Federal Government through the Royal Australasian College of Surgeons, is a program designed to perform rigorous assessments on the safety and efficacy of new procedures and technologies available in surgical practice, and to feed back this information to surgeons and the community.

Regional Meetings

Attend one of the five regional meetings on Wednesday 23 October to gain insight into what is going on around the world in evidence-based health care.

Australia

The Joanna Briggs Collaboration (JBC) Australasia Node meeting will focus primarily on three matters:

- A progress report on the regional project The Joanna Briggs Collaboration on Healthy Ageing presented by Dr Peter Roupas, Dr Tim Schultz and Dr Rick Wiechula.
- A short presentation on JBI’s approach to Public Engagement by Dr Suzanne Robertson-Malt and a discussion on how JBC Centres can contribute to this aspect of JBI’s strategic plan.
- An overview of the work of the 12 Centres that comprise the Node.

Asia

The purpose of the Nursing Panel is to discuss how to facilitate and implement evidence-based practices among practitioners in the Asian region of JBI.

Given the limited information about outcomes of nursing services, this panel also will share experiences on challenges and strategies to strengthen and integrate varied streams of evidences into nursing.

Panelists include JBI-Asian Regional Directors with extensive knowledge in evidence generation and consumption from China, Myanmar, Japan, Korea, The Philippines, Singapore, Taiwan and Thailand.

Central

The African region meeting will review the progress of each centre in Africa. It will assess the challenges each centre is facing. It will also try to find solutions and ways to meet those challenges for each centre, and identify specific challenges related to the support they receive from their parent institutions.

As well, issues such as maintaining the motivation to conduct systematic reviews, mentoring systems and progress reviews will be looked at. Each centre director will be asked to prepare a five-year development plan for their centre outlining resources required, such as finance, human resources and special skills, and how they are going to meet these resources with the help of their parent institution, JBI and other centres within the region.

Americas

The Americas region will continue their discussion of what the region can do better together than as individual centres. This discussion began in April 2012 with the goal of creating a community of practitioners to develop knowledge through the science of evidence synthesis and to promote the uptake of evidence.

During this session, we will continue to use a facilitative method to revisit the Ecological Development framework and goals related to communication, collaboration, synthesis and implementation. The group will review the progress toward goals and generate new all-America initiatives related to synthesis projects, and enhancing theoretical and conceptual aspects of systematic review.

Europe

This session is facilitated by the JBC European Centres and aims to provide delegates with the opportunity to gain insight into challenges and priorities in European health care economies, share experiences and contribute to discussions focusing on three topics:

- Shifting health care from the hospital to the home – challenges for education and training
- Public involvement in research and implementation – rhetoric or reality?
- Building research cooperation across Europe – using the COST framework

Each topic will be introduced through a 10 minute snapshot presentation followed by an interactive discussion around the issues raised.
Useful Information

Registration and information desk
The registration and information desk is located in the pre-function area on the lower level for collection of name badges and conference materials. Staff are on hand to answer any queries.

Name badges
Each delegate will receive a name badge on registration. This badge will be your official pass and must be worn to gain entry to all sessions, including the Convention Gala Dinner if you are attending.

Speakers preparation room
If you require a technical operations officer to assist you with AV requirements for your presentation, they are located on the lower level in the Acacia Boardroom.

A technical operations officer is available to assist presenters with loading their PowerPoint presentations. It is recommended that speakers provide their presentations via a memory stick to the technical operations officers the day before their scheduled presentation. This ensures that your presentation runs smoothly!
Notice board

Messages and program changes are posted on the notice board near the registration desk. Messages may also be left and collected from the notice board. Please check the board at regular intervals.

Lunches, morning and afternoon teas

All breaks including lunch, morning and afternoon tea are served in the Pre Function area on the lower level. If you have advised us of your special dietary requirement on your registration form, please make yourself known to the waiting staff so they can provide you with your special meal.

Mobile phones

As a courtesy to speakers and other delegates it is requested that all mobile phones and pagers be turned off or switched to silent during all sessions. Thank you.

Conference attire

The attire for the convention is neat casual or business. To ensure your personal comfort in rooms of varying temperature we suggest you bring a light jacket or shawl.

Internet

Complimentary wireless internet connection is available in all functions rooms.

Car parking

The closest car park to the Convention venue is the Riverbank Car Park. You can access this carpark from King William Road and Morphett Road via Festival Drive or from North Terrace via Station Road. For more information visit: www.adelaidecc.com.au/our-centre/carpark

Bus/train/tram

The InterContinental Adelaide is easily accessible by public transport.

Buses: Bus stops closest to the conference venue include Stop D, located on the Northern side of North Terrace and Stop W2, located on the southern side of North Terrace.

The Adelaide FREE 99C City Loop offers a free service within the city and stops at most major tourist sites and conveniently the Adelaide Railway Station (stop 8), which is close to the Convention venue. For more information visit: www.adelaidemetro.com.au/routes/99C

Train: Adelaide Railway Station is located less than a three-minute walk to the Convention venue.

Tram: Adelaide Railway Station Tram Stop is also less than a three minute walk to the Convention venue.

For timetables and further information please visit www.adelaidemetro.com.au or visit the Adelaide Metro Information Centre, corner King William Street and Currie Street (call toll free on 1300 311 108).

Banks

Banks are open from 0900–1600 Monday to Friday. Automatic Teller Machines (ATM) are also conveniently located around the city centre.

Shopping hours

Trading hours in the Adelaide Central Business District are as follows:
Mon to Thurs: 09.00 - 17.30
Friday: 09.00 - 21.00
Saturday: 09.00 - 17.00
Sunday: 11.00 - 17.00
Useful Information

Credit cards

Credit cards are widely accepted at hotels, shops and restaurants. Commonly used cards include Visa, American Express, MasterCard and Diners Club.

Tipping

Tipping is not widespread in Australia but for very good service in a restaurant you might choose to leave a small tip – no more than 10% of the bill.

Airport transport

Adelaide Domestic and International Airport terminals are located 10 kilometres west of the Adelaide Central Business District. You will need to allow approximately 15 minutes travelling time to and from your hotel. Your hotel can assist with airport transfers or alternatively there is a taxi rank located directly outside the airport terminal. For further information about getting to and from Adelaide airport visit http://www.adelaideairport.com.au/air-travel/to-and-from

Smoking policy

Smoking is banned in most public places in Australia, including the Convention venue. All restaurants, cafes, licensed premises, shopping centres and public transport are smoke-free.

Weather

The maximum average temperature in October ranges from 16–22 degrees Celsius. The average minimum temperature in October ranges from 8–11 degrees Celsius.

Adelaide, the 20-minute city!

Adelaide is a charming city surrounded by beautiful parklands. The city rises from the middle of a tree-covered plain, between rolling hills to the east and beaches to the west.

Designed in a grid system with the River Torrens flowing through the centre, Adelaide is easy to get around, so there is little wonder it is known as the ‘20-minute city’.

Enjoy stylish architecture, boutique shopping, sandy swimming beaches, fabulous arts and cultural venues, night life, fine dining, and some of Australia’s best cafe strips. Stroll along the North Terrace boulevard and visit the many art galleries and museums. You can also visit the Adelaide Zoo, home to Australia’s only giant pandas, Wang Wang and Funi.
Adelaide is centrally located among the beautiful wine regions of McLaren Vale, Barossa Valley and Clare Valley, all of which are within day-trip distances. The airport is only seven kilometres away, and the Adelaide Hills and major beaches are less than half an hour away by car.

For more information visit:

The Joanna Briggs Institute International Convention 2013

The Virginia Henderson Global Nursing e-Repository allows everyone free access to a variety of distinctive nursing research and related items and offers free open access to authors. All nurse authors are invited to submit full-text research and evidence-based practice works including:

- Technical reports/committee papers/white papers
- Theses/dissertations
- Conference papers/presentation slides
- DNP/doctoral papers
- Datasets
- Faculty-created learning objects
- Preprint and postprint journal articles

All individual full-text submissions go through a peer-review process! Interested in submitting? Visit www.nursinglibrary.org

Open the door to the world of nursing research.

Saving lives... by getting knowledge into the hands of those who need it most!

Donate now and help us make a difference. Find out more: www.joannabriggsfoundation.org

The Faculty is guided by three key strategic priority areas:

- Research and research training programs
- Flagship and core learning and teaching programs
- Translation of education and research knowledge into person and place, practice and policy

Recognised as a world leader in health education and research, our degrees reflect the fact that health care goes beyond the work done by doctors, nurses, psychologists, dentists and other health practitioners. We develop highly skilled and compassionate professionals in their chosen careers who aspire to the highest standards of integrity and ethical behaviour.

Our coursework offerings are informed by relevant, cutting-edge research and are integrated with quality teaching. Our academics include outstanding staff who are national and international leaders in their fields, aiming to provide a high quality, student centred learning experience.

health.adelaide.edu.au

Improving the health and care of individuals and communities in South Australia, our region and globally through world class research, learning and practice.

BETTER EVIDENCE. BETTER OUTCOMES.
Evidence-based practice resources only available on Ovid

- Brought to you in collaboration with the Joanna Briggs Institute
- Evidence-rich resources to help you implement evidence-based practice
- Systematic reviews, recommended practices, evidence summaries and more
- Easy-to-use tools for point-of-care, appraisal, implementation, quality improvement and research—coming soon!

For more information email: asiapac@wolterskluwer.com
Member Benefits:

- Easy and efficient Software: ACQA has recently updated its software

- A Continuous Quality Improvement program: developed and reviewed in consultation with ACQA members to provide you with immediate access to a variety of quality improvement activities to monitor compliance, identify and record improvement activities and demonstrate outcomes for all consumers based on best practice and evidence based guidelines.

- Collaboration with the Joanna Briggs Institute: for support and to provide feedback on contemporary aged care issues and evidence based practice.

- Suitable for all aged care services: ACQA has been supporting rural, remote and very remote facilities for the last 12 years to reduce the burden of developing and maintaining a continuous quality improvement program.

ACMHN ~ SETTING THE STANDARD
JBI has a new Node!
The Tropical and Infectious Diseases node in Joanna Briggs Institute’s ConNNECT+ has been developed to meet the needs of people living in countries where tropical and infectious diseases are problematic.
Learn more by visiting: www.joannabriggs.org

The Joanna Briggs Institute is offering a range of short courses developed to help grow your skills and build your future in healthcare and allied health services. Expand your knowledge of evidence-based healthcare, change management, clinical auditing and clinical leadership.

Studying with JBI gives you a mix of self-guided learning, practical assignments, guided learning and group work. Our study-groups access the latest scientific knowledge, JBI’s talented staff, extensive resources and use our custom software packages.

Courses currently on offer are:-
- Full Comprehensive Systematic Review Training Program (one, three or five days)
- Clinical Leadership Program (one day)
- Evidence-based Clinical Fellowship Program (six months)

For further information, please visit www.joannabriggs.org

SAVE THE DATE
10-12 November, 2014

The School of Translational Health Science is offering The Master of Clinical Science, a postgraduate research degree designed to train students in research methodologies and techniques associated with evidence-based healthcare, and in the critical evaluation of evidence and research based upon the Joanna Briggs Institute model of Evidence-based Healthcare, software, resources and methods.

Students will attend two, one-week intensive research schools and a one day seminar in the first Semester of enrolment (Feb 2014), followed by a three day research school in subsequent semesters. Students conduct a systematic review and/or an evidence implementation project and submit a thesis based on this work.

It can be completed in 1-2 years and Australian citizens and permanent residents are exempt from fees for this program. A $1000 stipend to support remote candidature will be provided by the School of Translational Health Science.

Applications are now open for the 2014 intake commencing February 10, 2014

For more information and to register your interest please contact:
Assoc/Prof Craig Lockwood, (08) 8313 4880
